IMPORTANT DATES

Submission deadline:	**April 16, 1999**
Notification of acceptance:	May 15, 1999
Copies of abstracts due:	June 7, 1999
Symposium:	July 13-17, 1999

The First Panhellenic Logic Symposium took place in Nicosia, Cyprus in July 1997. It was attended by approximately seventy researchers from Greece and other countries who work on logic broadly conceived, from history of logic and philosophy of mathematics to mathematical logic and to logic in computer science. At the end of that symposium, it was decided to establish the Panhellenic Logic Symposium as a biannual scientific event that aims to promote the interaction and cross-fertilization between different areas of logic, to become a forum for the communication of state-of-the-art advances in logic by established researchers, and to provide an opportunity for young researchers to become familiar with the latest developments in logic. The symposium is open to researchers from Greece, as well as from other countries.

The Second Panhellenic Logic Symposium will take place at Delphi, Greece from July 13, 1999 to July 17, 1999. It will be hosted at the European Cultural Center of Delphi, a modern conference facility located in a unique natural setting and in close proximity to the archaeological site of Delphi. The scientific program of the symposium will consist of hour-long invited talks, three tutorials, a panel discussion, and presentations of accepted papers.

Original papers that fall within the scope of the symposium are solicited. Authors are invited to submit an extended abstract not exceeding five pages by **April 16, 1999**. Papers may be written in either English or Greek; they may be sent either as hard copy via postal mail or as a postscript file via email to one of the two addresses on the left. In addition, the authors should send a cover page with their addresses (postal and email), telephone numbers, and a statement classifying the paper in one of the following areas: Mathematical Logic and Set Theory; Logic in Computer Science; History of Logic, Methodology and Philosophy of Science; Other (please specify). All submitted papers will be reviewed by the scientific committee of the symposium, who will make final decisions on acceptance or rejection. Each accepted paper will be allocated a thirty-minute period for presentation and questions. Authors of submitted papers will be notified of the decision by May 15, 1999. Camera-ready extended abstracts (not exceeding five pages) will be due by June 7, 1999 for inclusion in the proceedings of the symposium.
